DOAN, KIET M

ART UNIT	PAPER NUMBER
----------	--------------

2683

DATE MAILED: 12/06/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/509,783	<b>Applicant(s)</b> KAMPHUIS, ROBERT	
	<b>Examiner</b> Kiet Doan	<b>Art Unit</b> 2683	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 21 September 2005.
- 2a) ☐ This action is **FINAL**.      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.  
 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-13 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 09/29/04 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
 a) ☐ All    b) ☐ Some \*    c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### DETAILED ACTION

This office action is response to amendment file on 09/21/2005.

#### *Response to Arguments*

Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 1-13** are rejected under 35 U.S.C. 103(a) as being unpatentable over Banktukul et al. (Pub. No. 2003/0091020) in view of Lorello et al. (Patent No. 6,459,904).

Consider **claims 1, 10**, Bantukul teaches method for executing a communication attempt with a mobile terminal device in accordance with attainability status of said mobile terminal device in a cellular communication network having a Short Message Service Center (SMSC) by (Paragraph [0003], Fig.1 Illustrate mobile terminal No.110/128 as terminal device wherein capable receive/transmit SMS which read on attainability of said mobile terminal device in a cellular communication network having (SMSC)). Bantukul teach the limitation **but fail to teach** querying said SMSC in said cellular network for obtaining an attainability status of said mobile terminal device, by evaluating connection

Art Unit: 2683

related data stored in said SMSC, wherein said connection related data related to messages pending for delivery to said mobile terminal device, and delivering said communication attempt to said mobile terminal device in accordance with said attainability status.

In an analogous art, Lorello teaches "Short message service notification better multiple short message service center". Further, Lorello teaches querying said SMSC in said cellular network for obtaining an attainability status of said mobile terminal device, by evaluating connection related data stored in said SMSC, wherein said connection related data related to messages pending for delivery to said mobile terminal device (C4, L1-39, teach the mobile subscriber available to receive message which means as attainability status of said mobile terminal device wherein Fig.7 show pending short message delivery), and delivering said communication attempt to said mobile terminal device in accordance with said attainability status (C4, L40-58, C9, L35-49, teach delivery message to mobile subscriber when available which means as delivering said communication said attainability status).

Therefore, it would have been obvious at the time that the invention was made that person having ordinary skill in the art to modify Bantukul and Lorello system, such that mobile terminal device in a cellular communication network having a Short Message Service Center (SMSC), obtaining an attainability status of said mobile terminal device and delivering, to provide means for keeping track and maintain the message for delivering to the users when available or capable receiving message.

Consider **claims 2 and 13**, Lorello teaches method according to claim 1, wherein said query of said SMSC further comprises a query of a Home Location Register (HLR) of the cellular communication network for an attainability status of said mobile terminal device and wherein said attainability status is obtained by evaluating connection related data stored in said HLR (C3, L14-28, Fig.1 Illustrate HLR No.102 wherein data stored in said HLR).

Consider **claim 3**, Lorello teaches method according to claim 1, wherein said connection related data are related to the connection state of said mobile terminal device (C3, L28-57).

Consider **claim 4**, Lorello teaches method according to claim1 wherein said data are location related (C3, L14-22).

Consider **claim 5**, Bantukul teaches method according to claim 1; wherein said valuating comprises the valuating of data related to the communication to be attempted (Paragraph [0008-0009] teach capable transceiver short message which means as valuating of data).

Consider **claim 6**, Lorello teaches method according to claim 1, wherein said query is executed by initiating a Short Message delivery to said SMSC, said

Art Unit: 2683

Short Message being destined for said mobile terminal device (Fig. 1, show SMSC No. 101 as being destined for said mobile terminal device No. 104).

Consider **claim 7**, Bantukul teaches software tool for executing a communication attempt with a mobile terminal device in accordance with the attainability status of said mobile terminal device in a cellular communication network, comprising program code means for carrying out the steps of claim 1 when said software tool is implemented in a program on a Short Message Service Center, Service Center or a network device (Paragraph [0032] teach program load which inherently contain software tool).

Consider **claim 8**, Bantukul teaches computer program for executing a communication attempt with a mobile terminal device in accordance with the attainability status of said mobile terminal device in a cellular communication network, comprising program code means for carrying out the steps of claim 1 when said program is run on a Short Message Service Center, a Service Center or a network device (Paragraph [0032] teach communication subsystem which contain computer program).

Consider **claim 9**, Bantukul teaches computer program product comprising program code means stored on a computer readable medium for carrying out the method of anyone of claims 1 to 6 when said program product is

Art Unit: 2683

run on a Short Message Service Center, a Service Center or a network device (Paragraph [0032]).

Consider **claim 11**, Bantukul teaches Short Message Service Center (SMSC) of claim 10, further comprising a component for generating a message according to results from the said component for evaluating (Paragraphs [0005-0006], Fig.1 which contain component for generating a message).

Consider **claim 12**, Bantukul teaches network device connectable to a Short Message Service Center (SMSC) of a cellular communication network (Fig.1, Illustrate the network which contain SMSC).

Lorello teaches comprising: components for sending and receiving messages, characterized by: a component for generating a message for querying a SMSC for data being related to messages pending for delivery to a mobile terminal device and transferring said data to said network device, a component for obtaining an attainability status from said transferred data (C4, L1-39), and a component for delivering communication attempts according to said attainability status (C4, L40-58, C9, L35-49, Fig.7, show as contain component would read on No.701-703).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Buyer et al. (Patent No. 6,928,290)

Art Unit: 2683

Knotts (Patent No. 6,658,260)

Sibecas et al. (Patent No. 5,940,756)

Salin (Patent No. 5,787,357)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiet Doan whose telephone number is 571-272-7863. The examiner can normally be reached on 8am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Trost can be reached on 571-272-7872. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
